

Nature Farming and EM Technology in Bhutan

T.R. Gurung

Head of School Agriculture Program

Department of Research and Development Services,

Ministry of Agriculture, Thimphu, Royal Government of Bhutan,

Abstract : *In June 1994, the Ministry of Agriculture, Royal Government of Bhutan with the assistance of UNDP/OPS, IFAD and Kyusei Nature Farming Center, Thailand introduced the concept and practical aspects of Kyusei Nature Farming and EM Technology to Bhutan and the result of EM technology already visible. Bhutan is receiving regular assistance in the form of technical expertise and finance from APNAN Bangkok. Through such assistance the concept and practices of Kyusei Nature Farming and EM Technology applications are being promoted through the school agriculture program in Bhutan and has been well accepted in the school agriculture program. This is in line with the national agriculture policy of Bhutan for sustainable and eco-friendly agriculture development and conservation of environment.*
